www.openpollinated.com

O.P. corn has stood the test of time. Green Haven carries only the best performing varieties.

Grow Your Future

Open pollinated (O.P) is a horticultural term meaning that the plant will produce seeds naturally. When these seeds are planted they will reliably reproduce the same plant as the parent. This means the farmer doesn't have to depend on just a few chemical/seed giants anymore. Corn growers are discovering a host of benefits from growing O.P. corn versus high-dollar hybrids. Now they can grow their own seed.....their own future! We've helped hundreds of farms begin their own seed bank.

Testimonials

We tested our OP silage the first year we grew it. It was the highest quality corn silage test we have had in seven years. The Protein, TDN and NEL were all higher and yield was similar to the hybrid.

*Scott Lepley
Cogan Station, PA*

We had our Wapsie Valley measured at 160 bushel per acre.

David Bach-MN

Wapsie did better than my hybrid last year. The deer ate the OP over the hybrid. It was 1.5% higher protein and higher test weight.

Leon Notsch-MN

I wish we had grown OP corn a long time ago. It was a stroke of good luck that we found your website. Big ears, stands well.

Brian Harp-NY

"There is no comparison in corn bread made with O.P. corn versus hybrid corn. You can carry the ears in your arms like stove wood."

*Larry Muskain
At Reeds Mills- VA*

We save our own Wapsie now. This isn't just good deer plot corn it is excellent deer plot corn. The Wapsie would have gone 110 bu if the deer didn't clean it out. I have never seen anything like it in my life. It's like a deer magnet.

*White Tail Ridge Hunting Club-
Jacob Iftner-IL*

"The open pollinated is good stuff. It stood very well. We liked it better than hybrids. We saw 130 bu easy and it wasn't the best land, it did excellent in dry weather. The protein is really good and the test weight in really high"

George Rupp - Chillicothe, MO

CALCULATING FREIGHT CHARGES (Cost per 50lb bag, from 1 to 4 bags; for 5 or more bags call for motor freight and save)
Please use the zone chart below that corresponds with the seed variety you are ordering. Locate and circle the first three digits of your zip code in the destination zip code column of that variety's zone chart to determine your zone for that variety. A freight cost by zone table is located on the front of the order form. Please determine the freight cost for each variety grouping ordered. Free shipping for 40+ bags total of any varieties from the same place.

Up to 4 bags, if more than 4 bags please call for rate quote.

Benefits of O.P.

- Create your own seed bank. Stop the perpetual reliance on large chemical/seed companies for high dollar genetically altered hybrid seed.
- See 10-25% higher protein
- See higher test weights
- More palatable to livestock
- Produce more pounds of quality meat per acre when you feed O.P. corn
- Produce larger ears with O.P. corn
- Green Haven Open Pollinated Seed Group offers high producing, short day, corn for a shorter growing season.
- Cost effective and convenient way to grow food plots and grain for wildlife enthusiasts.

You Should Know

It is understood that stalk strength and yield are lower in O.P. corn. We speculate that is one of the reasons why we are seeing higher nutrition numbers. We are accomplishing our goal to select corn that will stand to harvest and yield well with high nutrition. "We are seeing improved standability with 10-25% higher proteins and test weights with O.P. corn versus standard high-dollar hybrids."

Saving seed puts more control in the hands of the grower. There are no patents or trademarks. Anyone can use it for seed if they are willing to put in the time and effort. We not only encourage but will assist. For more information see us on the web;
